OF THE

BOOKS

IN THE

DEPARTMENT OF ZOOLOGY.

PRINTED FOR THE TRUSTEES OF THE BRITISH MUSEUM.

1880.

PRINTED BY TAYLOR AND FRANCIS,
RED LION COURT, FLEET STREET.

THE Library of the Zoological Department consists, 1st, of works acquired from the small annual grants or by means of exchange for the publications of the Department ; 2nd, of books received as donations ; and, 3rd, of the purely zoological works which were purchased out of the extraordinary grant made in the last financial year (1879-80). All these works are enumerated in the present List.

Separate copies of memoirs and papers published in periodicals or other mixed publications have only been admitted under distinct titles when they have been brought into the book-market, many Academies and Societies publishing and selling their memoirs separately ; but the separate copies of papers, of which a small number has been printed for the authors for private distribution, are not included.

The Zoological Library is especially poor in old works ; it contains only 70 of a date earlier than the year 1801.

As this List has been printed chiefly with the view of serving as a temporary guide in making additions to the Zoological Library, and of preventing the acquisition of duplicates for the General Natural History Library, no bibliographical completeness of the titles has been attempted ; on the contrary, the titles have been as much abridged as seemed to be consistent with the recognition of the works catalogued.
